REASON FOR TODAY'S CALL:
 The kitchen garburator is not working and water is not draining

DESCRIPTION OF WORK PERFORMED:
 -I unjammed the garburator and tested by filling and draining the sink while running the garburator. I did not find anything out of the ordinary inside the grinding chamber, it seemed to have seized up due to a buildup of rust. -I also ran the dishwasher through a short fill/drain cycle to remove the standing water inside.
