REASON FOR TODAY'S CALL:

Master Bathroom: The water in the toilet seems to be leaking, as we can hear the water dropping in the bowl every second. The toilet keeps running water into the bowl.

DESCRIPTION OF WORK PERFORMED:

Small bubbles had formed on the flushvalve gasket. The owner decided to replace the FillValve at the same time given the fact that the other one had been replaced and this one was original to the building. I replaced the FillValve, flushvalve gasket, and supply line. Tested and in good working order.
