REASON FOR TODAY'S CALL:  
 Our garburator is no longer working and has been collecting residue in there.

DESCRIPTION OF WORK PERFORMED:  
 The garburator grinding chamber was rusted out and un-fixable. I replaced the garburator with a new Badger5 garburator and tested by filling and draining the sink multiple times while running the garburator.

TECHNICIAN RECOMMENDATIONS:  
 There is water staining below the ABS p-trap but no leaks present, this could have been from a previous leak. I informed Zed that it may be a good idea to keep a small Tupperware container in this location in the chance that the leak returns in the future.
