PHONE 604.313.7607		EMAIL Leighwalker@shaw.ca	

REASON FOR TODAY'S CALL:

Each time I need flush the toilet, I have to lift the top off, push the black rubber part into place at the base, put the the top on, and wait for a couple of minutes until the water fills up again. Then, I can flush, but I have to hold the lever down for about 10 seconds until it flushes. Then the same problem occurs all over again. The garburator does not work. I just hear a faint humming sound when it should be working. Also, it takes a while for water to drain out of the kitchen sink. Also, when the dishwasher is on, some of the water comes up through the kitchen sink.

DESCRIPTION OF WORK PERFORMED:

-The garburator was leaking through cracks in the housing. I replaced the garburator with a new Badger5 and tested by filling and draining the sink multiple times while running the garburator. -The toilet flapper was warped and the FillValve float arm was sticking. I replaced the toilet FillValve, flapper, and supply line. I also installed a 3/8" retro shut off valve because the existing valve was starting to fail. Tested by flushing multiple times.

QTY.	CODE	DESCRIPTION	UNIT PRICE	PRICE
1		Supply & Install 1/2HP Badger5 Garburator	\$309.00	\$309.00
1		Replace Toilet FillValve, Flapper, Supply - Standard	\$169.00	\$169.00
