REASON FOR TODAY'S CALL:
 -replace garburator(Badger5) -install customer supplied shower head

DESCRIPTION OF WORK PERFORMED:
 -I replaced the garburator with a new Badger5 and tested by filling and draining the sink while running the garburator. -I installed the customer supplied shower head and tested.

TECHNICIAN RECOMMENDATIONS:
 During testing of the shower head I noticed that the tub spout is leaking where it connects to the wall. The tenant mentioned that this spout was just recently installed by another plumbing company, I suggested contacting them and letting them know ASAP. *before installing a new spout we always use silicone to seal around the copper where it comes through tile to ensure that if the spout were to fail in the future the water will run down the front of the tile and into the tub. If this was not sealed then the water leaking from the spout could very be leaking behind the tile. In any case it should be rectified ASAP.
