REASON FOR TODAY'S CALL:
 -shower leaking -2nd shower; water leaking out of top of shower head.

DESCRIPTION OF WORK PERFORMED:
 ---Guest Bathroom: I tightened a loose connection on the shower head and tested. I re-secured the lav faucet handle as well as the shower valve handle as they were both loose. ---Master Bathroom: -The shower handle turns past vertical(off position) which causes water to flow through the shower head. I informed the tenant that as long as he keeps the handle in the vertical position it will not run.
