REASON FOR TODAY'S CALL:  
garburator jammed.

DESCRIPTION OF WORK PERFORMED:  
-I was able to unjam the garburator and tested by filling and draining the sink. -While onsite Lori mentioned that the dishwasher has dirty water backing up into it on occasion. The dishwasher drain hose was not properly supported. It was supported below the bottom of the sink which would allow water to back flow into the dishwasher. I properly supported the drain hose under the countertop and tested by running the dishwasher through a few fill & drain cycles.

TECHNICIAN RECOMMENDATIONS:  
\*I left a garburator tool with Lori and showed her how to use it if the garburator seizes up n the future.
