**REASON FOR TODAY'S CALL:**

1. The garbage disposal (sink) hasn't been working for a while, I'd like to have it fixed. Also, residual liquid has started dripping below the sink. 2. Only hot water comes out of the kitchen sink (no cold water). Might also require a new kitchen faucet spout

**DESCRIPTION OF WORK PERFORMED:**

-I replaced the garburator with a new Badger5 and tested by filling and draining both sides of the sink while running the garburator. -The cold supply line to the kitchen faucet was turned off, I turned this back on and tested. The kitchen faucet is now getting both hot and cold water. -The kitchen faucet spout is cracked. I suggested contacting Grohe customer support as they may send out a new head under warranty to the original homeowner.
