REASON FOR TODAY'S CALL:
 Toilet clogged and flooded out of bowl rim. Toilet water shut off valve not working.

DESCRIPTION OF WORK PERFORMED:
 -I repaired the toilet shut off valve by replacing the washer, stem, packing, packing nut, and handle. I then used our 6' toilet auger to clear the toilet blockage. During testing I found that the toilet FillValve was not fully shutting the water off when the tank was full causing the toilet to run. I replaced the toilet FillValve and supply line and tested by flushing rolled up balls of toilet paper. Toilet did not back up once during testing.
