REASON FOR TODAY'S CALL:

Both the hot-water and cold-water taps on bathtub stopped working; there is no water flow whatsoever. The bathtub was not used for about half a year. Conveniently for servicing, the bathtub plumbing is accessible through a removable access panel on the far side of the wall facing the bathtub. A problem with the same taps (sputtering) was fixed a few years ago.

DESCRIPTION OF WORK PERFORMED:

-The issue was again caused by the diverter cartridge located just below the junction of the Hot & Cold water lines. I removed the brass cap, tapped the diverter up to the open position, and used a small spacer I cut from a piece of 1/2" Wirsbo pipe to hold it u. I re-installed the brass cap and tested, water is now flowing freely with no sign of leaking below.

QTY.	CODE	DESCRIPTION	UNIT PRICE	PRICE
