REASON FOR TODAY'S CALL:
Leaking faucet in kitchen

DESCRIPTION OF WORK PERFORMED:

-The kitchen faucet was leaking through the cartridge and out of the handle. I replaced the cartridge(K35A) and during testing noticed that the pressure in the hot side was very low. I repaired the Hot shut off valve by replacing the washer, stem, packing, packing nut, handle, and flushed debris out of the hot line. Tested again and pressure is back to normal. -I also noticed another leak coming from the tailpiece connected to the left side of the sink drain. The nut securing the tailpiece was loose, I tightened this nut and tested by filling and draining both sides of the sink.
