REASON FOR TODAY'S CALL:
Leak under kitchen sink

DESCRIPTION OF WORK PERFORMED:
-The kitchen faucet was leaking internally and could not be repaired. I replaced the faucet with a new Symmons pull-out faucet and tested. -Hunter mentioned that food waste is easily clogging up the top of the kitchen sink drains. I replaced the basket strainers and re-piped the ABS drainage. Tested by filling and draining both sides of the sink multiple times. -Hunter also mentioned while onsite that the toilet Lever handle had broken. I replaced this toilet Lever and tested.

TECHNICIAN RECOMMENDATIONS:
*Hunter has been noticing a gaseous smell emanating from around the toilet. I could not smell anything while onsite but one possible cause for this smell could be a worn wax ring between the bowl and the floor flange. The only way to check this seal is to lift the toilet and re-install.
