REASON FOR TODAY'S CALL:
 Kitchen sink is leaking underneath the counter. Faucet is also leaking, but have already purchased a new faucet to have installed as well.

DESCRIPTION OF WORK PERFORMED:
 -The kitchen faucet was leaking from the handle onto the top of the sink. Some of this water was finding its way through to the cabinet below the sink. I installed the customer supplied kitchen faucet and tested. -The ABS drainage connected to the right sink was not connected as Drain was cut too low for the slipjoint to reach the tailpiece. I used a Fernco coupling to extend the slipjoint and tested by filling and draining both sides of the sink multiple times.
