REASON FOR TODAY'S CALL:
 -install toilet -connect sink and faucet

DESCRIPTION OF WORK PERFORMED:
 -The toilet flange was not secure to the floor. I secured the flange and when trying to dry fit the toilet noticed that the shut off valve behind the toilet was positioned in a way that would not allow for the new toilet to be installed. I cut an access in the wall, making sure not to cut higher than 5.25" so the 5.5" baseboard could cover the hole, and replaced the existing shut off valve with a new 1/4 turn valve then installed the toilet and tested. -I helped the guys onsite move the cabinet and countertop back into the bathroom then connected the faucet and re-piped the ABS drainage. Tested by filling and draining the sink multiple times.
