REASON FOR TODAY'S CALL:

A pipe under the bathroom sink is leaking, hot water. It was recently wiggled during a faucet replacement, most probably that is the cause of this issue. It leaks even with the valve shut off, apparently only from the rubber connection area. See attached pictures. Thanks.

DESCRIPTION OF WORK PERFORMED:

I cut the back of the cabinet wall to allow enough access to make a connection to the pipe coming through it. I removed the existing shut off valve, Wirsbo Coupling and supply line, and replaced with new. Tested and in good working order.
