REASON FOR TODAY'S CALL:
Leak under kitchen sink

DESCRIPTION OF WORK PERFORMED:
The Hot shut off valve under he kitchen sink(supplying faucet) was leaking. I tried to tighten the packing nut but the leaking persisted. I repaired the shut off valve by replacing the washer, stem, packing, packing nut, and handle. Tested and in good working order.

TECHNICIAN RECOMMENDATIONS:
I noticed some staining on the Cold valve but no sign of leaking. I believe this staining is likely caused by condensation which is no cause for alarm but I asked Mark to keep an eye on it over the next few days to make that no moisture is detected.
