REASON FOR TODAY'S CALL:  
Tub spout not diverting water to shower.

DESCRIPTION OF WORK PERFORMED:  
The shower head was spraying out of the sides, I replaced the shower head with new. The tub spout works but only if held down for 3-5 seconds to allow enough pressure to build before letting go. I asked the building manager onsite if the unit has isolating main water shut off valves but she said that she did not feel comfortable giving me this information. \*I later spoke with Rade the building manager and he mentioned that the PRV in building was set a little low. It has since been adjusted and the water pressure seems to be back to normal.
