REASON FOR TODAY'S CALL:
 Kitchen faucet loose Buz#2894 *keys available for pickup at Advent

DESCRIPTION OF WORK PERFORMED:
 ---Jan7: The nut that secures the faucet to the sink worked itself loose and the lever attached to the handle had fallen off. I was able to resecure the faucet to the sink but the lever portion of the handle is stripped and cannot be re-attached. The faucet will have to be replaced. During testing I noticed the garburator housing was cracked and there was signs of leaking. I replaced the garburator with a new Waste King 1001 and tested by filling and draining the sink multiple times while running the garburator. ---Feb16: I replaced the faucet with new and tested.
