REASON FOR TODAY'S CALL:  
 Kitchen faucet leaking \*keys ready for pickup at Advent

DESCRIPTION OF WORK PERFORMED:  
 The leak was coming from the connection between the faucet spray head and hose. I remove the head and found that the washer was missing. I installed a new washer then during testing noticed that the head was also spraying out of the side. I purchased a new head, installed it, and tested. Faucet is in good working order with no leaks present.
