REASON FOR TODAY'S CALL:

A) Kitchen Garburator - REPAIR or REPLACE Current Issue: I think something is jammed and the blades are unable to move. (Tripped the breaker on the thing and I can't dig out whatever is in there). B) Kitchen Faucet - REPLACE WITH NEW (hardware provided) Current Issue: REPLACE Never liked the design, looks fine but worked bad. Splashes all over was always too difficult to switch to spray mode on detachable hose handle thing. Eventually the rubber switch membrane has broken. C) Master Bathroom sink / master bathroom bathtub drain Current Issue: CLOGGED This sink has always been an issue for us with slow draining etc. I've opened up the U-trap and clean it out all the time but I think there is a blockage further down the line - perhaps construction waste from the beginning.

DESCRIPTION OF WORK PERFORMED:

-I installed the customer supplied garburator and kitchen faucet. Tested by filling and draining the sink multiple times while running the garburator. -I used the PowerSpin drain snake to clean the tub and lavatory drains in the master bathroom.
