REASON FOR TODAY'S CALL:  
Kitchen sink leak, unknown location

DESCRIPTION OF WORK PERFORMED:  
I filled and drained both sides of the sink but there was no leaking from the drainage or faucet. I splashed some water on the countertop around the faucet but still saw no sign of water leaking through. I then splashed some water around the lip of the undermount sink which caused water to leak through. The sink should be siliconed around the lip where it connects to the countertop but this shouldn't be done until the area is fully dry. I scraped out the wet, loose silicone and informed Will to be cautious while using the sink not to allow water to spray onto this area.
