REASON FOR TODAY'S CALL:
 Faucets leaking in the kitchen and bathroom. Could you please check the shower too? Slow drain

DESCRIPTION OF WORK PERFORMED:
 -I tested the kitchen faucet by running it through different mixtures of hot and cold while turning side to side and pulling the spray hose in and out but could not see any leaking. -I tested the lavatory faucet and could not see any sign of leaking. -The tub spout was leaking where it connects to the wall. I disassembled the spout and reinstalled, making sure all fittings were secure. -The tub drain is free and clear.
