REASON FOR TODAY'S CALL:
leak under lavatory sink

DESCRIPTION OF WORK PERFORMED:
The leak was coming from the connection between the lavatory faucet supply line and the fitting that adapts the odd thread size to fit the standard 3/8" connection. The fitting was a little loose. I tightened this connection and tested. No leaks present.

TECHNICIAN RECOMMENDATIONS:
Although the leak has been resolved i have suggested that Nicolas inquire with the building manager to see if others have experienced this same issue and if simply tightening this connection turned out to be a long lasting solution. If not then replacement of the faucet would be suggested to mitigate the chances of future leaking.
