REASON FOR TODAY'S CALL:
 Locate source of ongoing leak from drainage connected to the tub.

DESCRIPTION OF WORK PERFORMED:
 I met with Sam from Trotter & Morton and Alistair from the Elan strata. Alistair and Sam were with me in unit 1107 as I removed the fire-stopping sealing the space around the copper drain that runs from the tub of unit 1207, through the concrete, to the ceiling of unit 1107. Once the fire stopping was removed we could see a hole in the copper drainage that runs through the concrete between units 1207 & 1107(pictures attached).
