REASON FOR TODAY'S CALL:

After flushing the toilet it often keeps making a noise. The noise sounds like the toilet is still running. Sometimes the round rubber thing at the bottom of the tank that blocks the water seals, and then the toilet doesn't make this noise. Sometimes jiggling the flusher outside the tank will also stop the noise, but sometimes this doesn't work. We're sending 3 pictures of inside the tank - just before flushing and while flushing.

DESCRIPTION OF WORK PERFORMED:

I replaced the toilet Fill Valve, flapper, supply line, and tank lever. Tested and in good working order.
