REASON FOR TODAY'S CALL:
 We have 3 toilets that don't stop filling the tank or it takes too long to fill the tank

DESCRIPTION OF WORK PERFORMED:
 ---Office: The flapper was warped, allowing water to continuously run from the tank through the bowl. I replaced the flapper and tested. ---Master Ensuite :The toilet FillValve was set a little too high, allowing water to trickle through the overflow tube. I set the FillValve float height a little lower and tested. ---Guest Ensuite:The left arm of the flapper became detached, causing the flapper to sit off centre and water to continuously flow through. I reattached the flapper arm and tested.
