PHONE 778.371.9568		EMAIL aperl@sfu.ca	

REASON FOR TODAY'S CALL:  
Slow leak on under-sink water filter in kitchen.

DESCRIPTION OF WORK PERFORMED:  
 -The leak seemed to be coming from between the water filter housing and the bracket it attaches to. This leak worsened when the water supply valve was turned off. I added Teflon tape to the threads of the filter bracket and reinstalled the filter and housing. Tested and no leaks present. -The master toilet flapper was sticking in the open position on some flushes. I found the lever to be catching. I adjusted the lever and tested.
