REASON FOR TODAY'S CALL:  
Garborator is not working properly.

DESCRIPTION OF WORK PERFORMED:  
I was able to unjam the garburator and tested by filling and draining the sink multiple times while running the garburator. Nothing was pulled out of the grinding chamber, it seemed to have seized up due to rust buildup. I informed the tenant that it would be a good idea to turn the garburator on periodically even if it's not being used to help mitigate the chances of rust seizing it up again.
