REASON FOR TODAY'S CALL:
Leaking garburator

DESCRIPTION OF WORK PERFORMED:

-The garburator was leaking through the bottom and could not be repaired. I replaced the garburator with new and tested. -While onsite it was mentioned that the kitchen faucet was wobbly and there is also a leak coming from the right side of the kitchen sink. The base of the kitchen faucet was installed incorrectly. I installed this base properly and tested. The basket strainer in the right side of the sink is broken internally and will have to be replaced.
