REASON FOR TODAY'S CALL:

My shower drain will not drain. I think something has fallen down the drain and blocked it. It was operating fine when I had a shower that morning and when my mom had a shower later in the day it would only drain very slowly over time. I have tried liquid drain and tried to use a snake on the drain but it has not improved at all.

DESCRIPTION OF WORK PERFORMED:

-I cleared the shower drain using the PowerSpin drain snake. -While onsite Scott mentioned that he was experiencing a loud gurgling noise emanating from his tub drain. The sound usually starts at around 5:30am and is so loud it wakes him up. I ran the PowerSpin drain snake through the tub drain but only pulled out a small amount of hair. If the sound continues I recomend consulting with the building manager to find out if the buildings main drainage could somehow be causing this noise.
