PHONE 604.729.9017		EMAIL ms.caueung@gmail.com	

REASON FOR TODAY'S CALL:

The garburator does not work/is possibly stuck or very rusted that I might need a new one, but the sink will drain slowly if there is a lot of water in the sink, and it backlogs into the dishwasher. Everything seems to look fine on the outside.

DESCRIPTION OF WORK PERFORMED:

-The garburator was seized up due to rust. I was able to free it up and tested by filling and draining the sink multiple times while running the garburator. -I turned the dishwasher on to run it through a quick fill & drain cycle but it did not drain the standing water inside before starting the fill cycle. This caused water to leak out of the door onto the floor. I soaked this water up and ran the dishwasher through a few fill & drain cycles. The machine seems to be functioning normally but I am concerned that it did not recognize it was full before starting to fill. I recommended calling Lucas Appliance to ask for his opinion on whether this is normal or not.

QTY.	CODE	DESCRIPTION	UNIT PRICE	PRICE
1		Labour	\$109.00	\$109.00
SUBTOTAL:				\$109.00
GST (5%):				\$5.45
