**REASON FOR TODAY'S CALL:**

-The supply line to the master bathroom toilet is run in such a way that it is pinched between the wall and toilet, and there is a lot of pressure on the connection to the shut off valve. This could eventually pop off and flood. -Guest Bathroom(2nd floor): The FillValve is clogged up with debris that I could not clean out. It will have to be replaced.

**DESCRIPTION OF WORK PERFORMED:**

Due to the design of the toilets the toilet tanks could not be removed without lifting the entire toilet. I ordered 2 Duravit tank to bowl kits from Cantu. ---Master: I lifted the toilet, removed the tank and reinstalled with a new duravit tank to bowl kit, toilet supply line, and ran the supply line in a way that does not add stress to the 3/8" compression connection. ---Guest Bathroom: I lifted the toilet, and reinstalled with a Duravit tank to bowl kit, fill valve, and supply line.
