REASON FOR TODAY'S CALL:

1) The garbage disposal machine in the kitchen was stuck. 2) I would like to replace the old kitchen faucet with a new one that I've bought. 3) I would like you to check the leakage under the kitchen sink.

DESCRIPTION OF WORK PERFORMED:

-The Hot & Cold shut off valves under the kitchen sink (connected to the faucet) were not working. I repaired these valves by replacing the washers, stems, packing, packing nuts, and handles. I then installed the customer supplied kitchen faucet. -I was able to unjam the garburator. Tested by filling and draining both sides of the sink multiple times. The slipjoint adaptor connected to the left sink tailpiece was loose, allowing water to leak out. I tightened this connection and tested again. No leaks present.
