REASON FOR TODAY'S CALL:
Our toilet running. Replaced flap but issue not resolved. Or maybe installed wrong!

DESCRIPTION OF WORK PERFORMED:
The flapper wasn't seating correctly and the fillvalve was fully shutting off when the tank was full. I replaced the fillvalve,flapper, and supply line. Tested and in good working order.

TECHNICIAN RECOMMENDATIONS:
*The tank lever is not fully secure to the tank. I tried to secure it but the set screws are rusted and won't budge. If this is an issue a new lever will have to be ordered from Duravit.
