REASON FOR TODAY'S CALL:  
Leak from plumbing located in the shower

DESCRIPTION OF WORK PERFORMED:  
 ---May29: Water was leaking out of the grout below the 2 shower valves. I removed the left(higher) trim plate and found a small amount of moisture collecting between the trim plate and the tile. I believe this was just from water running down the tile. When I removed the right trim plate(lower) I could see water leaking from the valve into the wall. I took pictures and will have to reach out to our wholesalers and inquire about the make and hopefully availability of parts. ---July25: I ordered and replacement cartridges for the right(lower) shower valve and installed. Tested and no leaks present.
