REASON FOR TODAY'S CALL:
 Kitchen sink where knobs to turn water on and off (underneath the sink) leaks when tap is in use. Doesn't leak when not in use

DESCRIPTION OF WORK PERFORMED:
 Bernadette was not able to locate the main water shut off valves so repair of the two angle stops under the sink was not possible. I was however able to stop the leak from the Hot & Cold valves by tightening the packing nuts. Tested and no leaks present.
