REASON FOR TODAY'S CALL:

-kitchen faucet loose. -bathtub water pressure very low. -master Lav sink: one tap runs full pressure the other one low.

DESCRIPTION OF WORK PERFORMED:

-I was able to reseal the kitchen faucet by tightening the nut that secures it to the counter. -The cold pressure in the lavatory faucet was low because the shut off valve was partially closed. I opened this valve and the pressure is back to normal. -The aerator in the tub spout was full of debris. I replaced the aerator but the tenants preferred the flow of water they received by having no aerator installed. I removed the aerator and the tub fills much quicker.
