REASON FOR TODAY'S CALL:

Sink faucet leaks when turned on, but we are not sure from where. It is a hose-type faucet and we mostly notice water from around the base and the next ring up. We have disconnected it from the hot and cold water and shut them off already. thanks! *Ivan 778.323.4826

DESCRIPTION OF WORK PERFORMED:

When I arrived the faucet had been partially removed. I reinstalled the parts of the faucet that were detached and tested. The leak is coming from the pullout spray hose. I suggested contacting a Kohler customer support as they will typically mail replacement parts like this out for free to customers. I explained to Ivan how the new hose is installed but also said that if he ran into any troubles during install we would be happy to return and install it for him.
