REASON FOR TODAY'S CALL:
Tub/shower diverter not working.

DESCRIPTION OF WORK PERFORMED:

-There are 2 pieces to the diverter handle and the set screw securing them together became loose. I tightened the set screw and added some adhesive to ensure it doesn't come apart again. Where the handle attaches to the trim it is missing a clip on the backside so I used zap strap to secure it in place. If the handle itself detaches from the trim plate in the future a new trim and handle will have to be ordered from Danze. -I removed three pieces of what appeared to be porcelain from the garburator grinding chamber. Tested and in good working order.
