REASON FOR TODAY'S CALL:

We have a leaking kitchen faucet in our suite. It is leaking at the cartridge, I think. If we can replace the cartridge, that would be great. I am attaching a video so hopefully you can diagnose and give me a quote. Appreciate your help!

DESCRIPTION OF WORK PERFORMED:

-The shut off valves under the kitchen sink (connected to the faucet) were not working. I first repaired these valves by replacing the washers, stems, packing, packing nuts, and handles. I then replaced the cartridge (K35A) within the kitchen faucet and tested. -During testing I noticed the kitchen sink drain was backing up. I found the garburator to be jammed. I was able to unjam the garburator and tested by filling and draining the sink while running the garburator.
