REASON FOR TODAY'S CALL:
I would like to make an appointment to fix the leaking drain pipe on my kitchen sink and look at my toilet to ensure it is installed properly.

DESCRIPTION OF WORK PERFORMED:
-The slipjoint nut above the ptrap was cracked. I replaced this nut and the beveled washer that sits below. During testing I noticed a small amount of water drip out of the DW drain hose. The corrugated hose was shortened during installation and a clamp secured around it. I was able to tighten this clamp a little further but the leak persists. I suggest having a appliance repairman in to take a look and either properly attach this hose or replace it with one that hasn?t been cut. -The Toilet in the master bathroom is not properly secure, we?ll have to return on another date to lift and reset the toilet.
