REASON FOR TODAY'S CALL:
I need to install new tap in the bathroom.

DESCRIPTION OF WORK PERFORMED:
I installed the customer supplied faucet and noticed leaking coming from the spout. This leaking occurred at the top as well as below the faucet. Boris informed me at this point that the faucet was given to him by someone in the building that was doing a renovation. I detached the spout from the faucet base and reattached using teflon tape to all the threads. The leaking stopped but I still suggested purchasing and installing a new faucet as this one may hav been taken apart by the original owner and it?s possible parts are missing.
