REASON FOR TODAY'S CALL:

3 things - bathroom sink drain very slow - needs to be cleared. Shower water temp fluctuates, balance to be checked? Kitchen faucet drips when off in hot water position but not cold - maybe a washer issue? All minor but they need to be fixed. Thanks.

DESCRIPTION OF WORK PERFORMED:

-I used the PowerSpin drain snake to clean the master bathroom lavatory(left) sink and tested. -The hot shut off valve under the kitchen sink(connected to the faucet) was not working. The location of the main water shut off valves will have to be located before repair of this valve can be made. Once this valve has been repaired we can then replace the faulty cartridge within the kitchen faucet. -The shower cartridges in the master bathroom shower are of a type that we are having troubles procuring. I will reach out once replacement cartridges can be found.
