REASON FOR TODAY'S CALL:

There was water found pooling under my sink which led to water seeping into the apt below me. I can't find the leak and the people below me came to my apt last night indicating that a water patch was forming on their ceiling. I had just completed a rinse cycle on my dishwasher. However this seems to have been a chronic situation based on the state of my particle board cupboard condition.

DESCRIPTION OF WORK PERFORMED:

The garburator was leaking right through the bottom of the unit. I replaced the garburator with a new Badger5 and tested by filling and draining the sink multiple times while running the garburator.
