REASON FOR TODAY'S CALL:

My kitchen faucet has been leaking for a while via the stem. Assume it was a broken washer or o-ring. Now the whole stem pops out when the water is turned on (see detail in picture). Not sure if it can be repaired or needs a complete replacement. Expert advice, quote and appointment is appreciated!

DESCRIPTION OF WORK PERFORMED:

I was able to stop the leaking by replacing orings within the faucet stem. Tested and in good working order.
