REASON FOR TODAY'S CALL:

My kitchen faucet is leaking, and I can't turn off the cold water in my bathroom sink. I had turn off the actual valve under the sink. I have no idea how either of these things came about, and both happened on the same day! Please help. :(

DESCRIPTION OF WORK PERFORMED:

-The issue with the lavatory faucet was that the Cold handle kept spinning but wouldn't turn off. This cartridge was replaced not long ago and i'm not sure how this happened but the problem seems to have resolved itself and I couldn't recreate it. -The kitchen faucet was leaking from a loose connection between the spray head and spray hose. I tightened this connection and tested. Although no other leaks were detected I suggested keeping a Tupperware container in the cabinet below the faucet so that if other leaks develop the water will not cause damage to the cabinets. -While onsite it was mentioned that the tub was draining slowly. I used the PowerSpin drain snake to remove hair, bobby pins, and a piece of hard plastic. Tested by filling the tub 8? and draining.

QTY.	CODE	DESCRIPTION	UNIT PRICE	PRICE
1		Clean drain using PowerSpin / Tub/Shower	\$139.00	\$139.00
			SUBTOTAL:	\$139.00
			GST (5%):	\$6.95
			TOTAL:	\$145.95
