REASON FOR TODAY'S CALL:
 Issues with Hot/Cold water crossover. Shower cartridges believed to be the culprit. Remove and reinstall 2 shower cartridges.

DESCRIPTION OF WORK PERFORMED:
 -When I arrived onsite I was informed that the issue with the shower valve cartridges was resolved by someone at Grohe who made a site visit. -It was mentioned that the laundry machine was not getting hot water and the dishwasher was suspected of being supplied with cold water. The washing machine was not getting hot water because the hot shut off valve was in the off position. I turned this valve on and tested by running the machine through a quick cycle. The dishwasher supply is connected to the hot pex piping, this is visible under the sink. I ran it through a quick cycle to confirm that it is being supplied with hot water.
