REASON FOR TODAY'S CALL:
New dishwasher couldn't be installed bc of leaky shut off valve.

DESCRIPTION OF WORK PERFORMED:
The leak was coming from the in-line shut off valve for the dishwasher. I first repaired this leak by replacing the warm out o-ring inside and tested. I then installed a new 1/4 turn shut off valve with a 3/8 compression thread which is the most commonly used for dishwasher supply hoses.

TECHNICIAN RECOMMENDATIONS:
*When I arrived onsite there was a large plastic bowl under the kitchen faucet collecting water. This container was full and overflowing. I emptied this container and dried the area the best I could. The leak is coming from the kitchen faucet spray hose and should be repaired ASAP to avoid further water damage to the cabinets below the sink.

QTY.	CODE	DESCRIPTION	UNIT PRICE	PRICE
1		Replace 1/2" x 3/8" Angle Or Straight Stop	\$159.00	\$159.00
			SUBTOTAL:	\$159.00
			GST (5%):	\$7.95
			TOTAL:	\$166.95
