REASON FOR TODAY'S CALL:

When I switch the garburator on, there is a small buzzing sound but seems like the blades won't turn (not noisy enough). Then after about 5 seconds or so, even the buzzing itself dies. Tried the reset button and same thing happens each time. Do I have a busted garburator or is this fixable? And if for complete replacement of the garburator, how much is the cost of labor? Thanks!

DESCRIPTION OF WORK PERFORMED:

I replaced the garburator with a new Badger5 and tested by filling and draining the sink multiple times while running the garburator.
