REASON FOR TODAY'S CALL:

Hello, sink drainage does not work after disposing a lot of vegetable waste in the garburator yesterday afternoon. We've tried vinegar and baking soda and waited til this morning but it seems still clogged somewhere in the pipes as the sink water does no go down.

DESCRIPTION OF WORK PERFORMED:

I used the PowerSpin drain snake to clear the kitchen sink drain blockage and tested by filling and draining both sides of the sink.

TECHNICIAN RECOMMENDATIONS:

The garburator grinding chamber has deteriorated to the point that large holes are now present. These holes will be letting larger pieces of food pass through which is likely the reason for the drain clogging. I've let Kelly know that the garburator should not be used until it is replaced or the drain will likely back up again.
